

A live massive party based on ancient instruments and new surprising music.

The three members of the group are the top league of the “Electro acoustic” scene in Israel. Between numerous projects, World-wide tours and different musical worlds- the three members united to this unique group.

In the last three years ONOGANA lled up festivals, bush parties and clubs all over.

Their show is an organic party with live instruments.

The rare musical communication between the three instrumentalists transfers the music from the stage to the crowd in a way so direct and unbarred that it seems as if the crowd and the band arrived as one package from the workshop of ONOGANA.

Last July Onogana went out to a European tour with their new album “Nayan” and created a big buzz at every festival and club they performed in. Friends from all over the world joined the growing tribe around this special happy trio.
