

A "modular concert" will be the precise way to describe Shtuby's (Yuval Tal) Avant-garde project. Influenced by Funk, Jazz and Groove mixed with Electronic music, Shtuby is constantly active in the world of electronic music technology with a great passion to live instruments, thus creating a unique hypnotizing show. Shtuby avoids being captured under specific musical style or genre, together with a band he starts a journey that some times feels like multiplayer concert and at times like a wild party. Shtuby combines many musical instruments in to this set, such as Theremin, Clarinet, Synths, Percussion, and a full band comprises Drums, Flute, Bass, Keytar and it all gets colored with bizarre texts. Loyal to the freedom of creativity, the whole show is created in real time, what makes every show a new unique experience!
