

# **TINY FINGERS**

**Tiny Fingers** combine post-rock, live electronics, psychedelic and groove, forming a powerful, super-intensive musical mix. With broken beats, unique guitar playing, fat bass and fresh synthesized sounds, they integrate the messy intensity of rock music with the ecstasy of electronic raves, creating a thick, unrelenting sound trip.

An emerging festival favorite both in their home base of Israel and abroad, their live act is a mind blowing experience of futuristic sounds and visuals, leaving the sweaty fans begging for more. It's led them to be handpicked to open for **The Mars Volta** and **Damian Marley**, share the stage with **Dub Trio**, **All Them Witches** and many more. The Fingers have been touring nonstop over the past few years, mostly in Europe and Asia playing in many clubs and festivals such as: CMJ, Fusion Festival (Germany), Liverpool Sound City (UK), Exit (Serbia), Strawberry festival, MIDI Festival, Zhangbei Festival, SOTX (China), Spring Scream Festival (Taiwan), Mighty Sounds (Czech Republic) and much more.

The band's debut album, "*Massive Fingers Spacetrrip*", was released in 2011 to critical acclaim. It was quickly followed by "*Foreign Telegrams*". In 2012 the Fingers released "*Megafauna*", an album comprised solely of one long instrumental live set. "*We Are Being Held By The Dispatcher*" was released in 2013. In 2015 Tiny Fingers have released "The Fall", the band's fifth album.

## **Live Videos:**
